

## Optical System Engineering Seminar, Part 2

4 units (compulsory)

Teacher of course

**Target)** Through seminars concerning the theme of the master's thesis, to learn the professional knowledges and skills, to obtain the ability to apply them, to obtain ability to learn spontaneously knowledges which are lacked, and furthermore to develop the communication and roles in the research work, and to obtain the ability to make management in collaboration project.

**Outline)** To discuss on the paper concerning the theme of the master's thesis, and make presentation in the student's research group.

**Goal)**

1. to master professional knowledges and skills in optical system engineering and ability to apply them
2. to learn knowledges which are lacked in optical system engineering
3. to develop the communication and role in the research work and to manage the collaboration project
